D

Obv.

- 1 Month XII₂, night of the 28th, ...
- 2 first part of the night, Mars was 1 cubit above δ .
- 3 Cancri; last part of the night, clouds crossed the sky.
- 4 The 28th, in the morning, clouds crossed the sky, south storm,
- 5 all day very overcast. Night of the 29th, beginning of the night, clouds were in the sky;
- 6 solar eclipse which was omitted; at 58° before
- 7 sunrise. The 29th, very overcast. The 30th, very overcast; in the afternoon,
- 8 the south wind blew. The 30th², Jupiter's acronychal rising.
- 9 Month I, the 1st (of which followed the 30th of the preceding month), sunset to moonset:
22°, it was bright.
- 10 [Night of the 1st, the moon was] 2 cubits above α Tauri,

Rev.

- 1 [the moon] having passed [...] to the east. The 1st,
2 [...] blew. Night of the 2nd, the moon was
3 $1/2$ cubit in front of ζ Tauri, the moon being $1/2$ cubit
4 low to the south. The 2nd, thin clouds were in the sky.
5 Night of the 3rd, thin clouds were in the sky; the moon was 1 cubit below
6 μ Geminorum, the moon being $1/2$ cubit back to the west.
7 The 3rd, thin clouds were in the sky.
8 That month, the river level from the 12th to the 22nd
9 receded 1 cubit 4 fingers, total: 19 was the *na* (gauge); from
10 the 24th^{sic} to the 30th, it rose $1 \frac{5}{6}$ cubits,
11 total: 9 was the *na* (gauge); the 1st, 2nd, and 3rd, it rose 20^2 fingers,

Upper edge

- 1 [total: x] + 8 was the *na* (gauge). That month, the 23rd, locusts
2 attacked, but took nothing.
